

Product Requirements Document (PRD)

Real Estate Deal Evaluator

Version: 1.0

Product Type: Web Application (Browser-based)

Primary Platform: Mobile + Desktop Browser

Authentication: No-login by default

Target Launch: MVP in 90 days

1. Product Overview

Real Estate Deal Evaluator is a **browser-based, no-login property investment analysis tool** that enables agents, investors, lenders, and brokers to evaluate, compare, and present real estate deals instantly using institutional-grade financial metrics.

The platform calculates:

- ROI
- IRR
- Cap rate
- Cash flow
- Cash-on-cash return
- DSCR
- Equity multiple
- Breakeven year
- 10-year projections

It also generates **client-ready reports** and **side-by-side property comparisons** within seconds.

The goal is to become the **fastest and most trusted deal evaluation tool for real estate professionals**.

2. Product Vision

To become the “**Zillow for Investment Analysis**” — a platform where anyone can instantly determine whether a property is a good investment.

The product transforms complex underwriting into **clear, defensible investment decisions** that can be shared instantly with clients.

3. Product Goals

Primary Goals

1. Enable deal analysis in **under 60 seconds**
 2. Provide **institutional-grade metrics** without spreadsheets
 3. Generate **client-ready reports instantly**
 4. Support **side-by-side property comparison**
 5. Maintain **zero friction (no login required)**
-

Business Goals

1. Reach **100k monthly users via SEO**
2. Convert **2–5% of users to paid features**

3. Generate **\$50k+ MRR within 24 months**
-

4. Target Users

Primary Users

Real Estate Agents

Agents working with investor clients who need quick property evaluations.

Real Estate Investors

Individual investors evaluating rental properties.

Small Syndicators

Small groups evaluating acquisition deals.

Lenders / Mortgage Brokers

Need quick underwriting checks.

Secondary Users

- Wholesalers
 - Property managers
 - Real estate analysts
 - Small hedge funds
-

5. Core Jobs To Be Done

Job 1

“In 60 seconds, determine if this property is a good investment.”

Job 2

“Compare multiple deals and identify the best opportunity.”

Job 3

“Show my client a professional report they understand.”

Job 4

“Test scenarios like adding an ADU or doing a rehab.”

6. Product Scope

In Scope

- Single property analysis
 - Multi-property comparison
 - Scenario modeling
 - Market intelligence
 - AI deal scoring
 - PDF reports
 - Email summaries
-

Out of Scope (Initial Release)

- Portfolio management
 - CRM functionality
 - Large commercial underwriting
 - Full MLS integrations
-

7. Core Features

7.1 Property Input System

Users enter basic property details.

Inputs

Property Info

- Address
- ZIP code
- Purchase price
- Property type

Income

- Monthly rent
- Other income (parking, laundry)

Expenses

- Property taxes
- Insurance
- Management
- Maintenance
- Vacancy
- CapEx reserve

Financing

- LTV
- Interest rate
- Loan term
- Amortization
- Closing costs
- Rehab budget

7.2 Calculation Engine

System calculates real estate investment metrics.

Metrics

Cap Rate

Cap Rate = NOI / Property Price

Cash-on-Cash Return

Annual Cash Flow / Total Cash Invested

Internal Rate of Return (IRR)

10-year return including appreciation and debt amortization.

DSCR

NOI / Debt Service

Equity Multiple

Total Cash Returned / Cash Invested

Breakeven Year

The year cumulative cash flow becomes positive.

7.3 10-Year Financial Projection

Generate annual projections including:

- rental income growth
- expense growth
- loan amortization
- property appreciation
- exit value

Output includes charts for:

- cash flow
 - property value
 - equity growth
-

7.4 Multi-Property Comparison

Users can compare **2–5 properties side-by-side**.

Example comparison table:

Metric	Property A	Property B	Property C
Purchase Price	\$650K	\$720K	\$690K
Cap Rate	6.2%	5.8%	6.9%
Cash-on-Cash	9.3%	7.4%	10.1%
IRR	15.7%	13.8%	16.4%
Equity Multiple	2.4x	2.1x	2.6x

System highlights **best deal**.

7.5 Scenario Modeling

Users can create scenarios:

Example:

Scenario	Description
As-Is	Current property condition
Rehab	Renovation scenario
ADU	Add accessory dwelling unit

Each scenario recalculates:

- rent
- property value

- ROI
-

7.6 Market Intelligence

Show ZIP-level market data.

Example:

Metric	Value
Median Price	\$820K
Median Rent	\$3,900
Rent Growth	5.2%
Vacancy Rate	4.3%

7.7 Location Investment Score

Calculate market attractiveness.

Score based on:

- rent growth
- job growth
- vacancy
- population growth
- price-to-rent ratio

Score range:

0 – 100

7.8 AI Deal Score

System generates:

DealScore™

Score based on:

- cash flow
- IRR
- risk
- leverage
- market conditions

Example output:

DealScore: 82 / 100

Grade: A

7.9 Pricing Intelligence

System analyzes if a property is overpriced.

Compare with:

- local comps
- median price
- price per square foot

Example output:

Market Value Estimate: \$705K

Listing Price: \$650K

Status:
Undervalued

7.10 Rent Validation

System checks if entered rent is realistic.

Example:

Entered Rent: \$4,200
Market Median: \$3,800

Warning:
Your rent assumption is 10% above market.

7.11 PDF Report Generator

Generate professional report.

Report sections:

Page 1

- property summary
- key metrics
- deal score

Page 2

- financial projections

Page 3

- charts

- glossary
-

7.12 Email Report

Users can send email summary.

Email includes:

- investment summary
 - key metrics
 - report link
-

8. User Experience

UX Principles

- zero friction
 - mobile first
 - instant feedback
-

Flow

1. Enter property
2. View results instantly

3. Compare scenarios
 4. Generate report
-

9. Non Functional Requirements

Performance

Calculation time < 500ms.

Availability

99.9% uptime.

Security

No user data stored by default.

Privacy

All calculations client-side.

10. Monetization

Free Tier

- property analysis
- basic PDF
- single comparison

Pro Day Pass

Price:

\$15 for 24 hours

Includes:

- unlimited analysis
- advanced charts
- scenario modeling

Premium PDF Pack

\$79 for 10 reports

Includes:

- white label reports
- advanced charts

Professional SaaS

Agent Plan

\$29/month

Investor Plan

\$49/month
